

## **GOVERNMENTAL STRUCTURE**

The structure of the Town's government combines a modern professional approach with the traditional town meeting form. Since 1957, the Town has been governed by a Town Council-Town Manager-Representative Town Meeting (RTM) structure. A revised Town Charter was adopted on November 4, 2008 and became effective January 3, 2009.

The Town Council is responsible for determining policy and appointing the Town Manager to execute this policy and administer the day-to-day affairs of the Town. The Council holds public hearings on the budget and sets the tax rate. It appoints one of its nine (9) members as Mayor to serve as chairperson of its meetings and as the Town's representative at ceremonial functions. The councilors each are elected for two-year terms.

The Town Manager is appointed by and directly responsible to the Council and serves for no definite term, but at the pleasure of the Council. The Manager is responsible to the Council for the supervision and administration of Town departments and boards and commissions of the Town, except those elected by the people, or appointed by the Council, Mayor or a regional or state authority. The Council appoints the Town's independent financial auditor.

The Council approves a budget that it sends to the RTM for consideration and final approval. The RTM must approve the budget before the Council sets the final tax rate. In most other matters, the RTM reviews the actions of the Council and has the power of initiative to institute legislation or force reconsideration of legislation already adopted. RTM members are elected by seven (7) voting districts for two-year terms.

Within the Town of Groton there are two political subdivisions, the City of Groton and Groton Long Point Association. In addition, there are seven (7) special taxing districts within the Town. For the political subdivisions, the Town funds approximately one hundred percent of their public works budgets and up to fifty percent of their public safety budgets. The special districts are organized units of government within the Town, having separate governing bodies. They were established by special acts of the State legislature for specific purposes such as fire protection. All these governmental units have individual taxing authority.

## **BUDGETARY CONTROL**

The Town maintains extensive budgetary controls. The objective of these controls is to ensure compliance with legal provisions embodied in the annual appropriated budget approved by the Town Council and RTM. Activities of the general fund, certain special revenue funds and the debt service are included in the annual appropriated budget. Project-length budgets are prepared for the capital projects funds. The level of budgetary control (i.e., the level at which expenditures cannot legally exceed the appropriated amount) is the function level within each fund.

At the direction of the Town Manager, all Department Directors are expected to follow strict guidelines for expenditure control within the approved function appropriation. The Town Manager reserves the right to set "administrative spending authority" limits when justified to maintain the fiscal integrity of the budget. Department Directors are evaluated on budget management abilities.

The Town also maintains an encumbrance accounting system as another method of maintaining budgetary control. All purchases, except certain services as outlined in the Town's Purchasing Manual, require a purchase requisition and a purchase order. In addition, purchases over \$500 require evidence that quotations were received and that the lowest quote, consistent with quality, was selected. The Town's Purchasing Manual requires formal competitive bids for expenditures over \$15,000. Funds are recorded as encumbered when the purchase order is issued and expenditures are recorded when the Town issues a check or incurs a liability.

All unexpended and unencumbered appropriations lapse at year-end except in the Capital Reserve Fund where appropriations are continued until completion of the projects or five years from date of appropriation, whichever is less. However, any project shall be deemed to have been abandoned if three (3) fiscal years lapse without any expenditure from or encumbrance of the appropriation therefore. Budgetary control in the Capital Reserve Fund is achieved by the constraints imposed by the project's authorization or grant awards related to these funds.

## **Budgetary Process**

The budget process for the Town of Groton begins in October of each year preceding the beginning of the fiscal year (July 1). This process is a time for priority setting: define and prioritize needs, evaluate alternatives, and then budget appropriately to meet those needs. Budget discussions with the Town Manager and Department Directors set the tone for implementation. During the FYE 2016 development, the Directors were asked to submit a "level service" budget. In addition, directors were asked to submit with their initial budget request, reductions in their budget that would bring about budgets representing a 0% increase from the FYE 2015 Adopted Budget.

### **The Budget Cycle:**

One of the functions of a budget is to provide a financial plan for the organization's operations for a given period of time. For the Town of Groton, the budget provides a plan from July through June of each year. Prior to implementation in July, the budget is developed with the aid, cooperation and resources of many participants. The entire process consumes almost a full year, from development of the goals, objectives and budget guidelines and assumptions by the Town Council in October through the implementation of the approved budget and printing of the Adopted Budget document. Opportunities for public comment are available throughout March and April before the final adoption of the budget by June. An overview of a typical Town of Groton Budget Cycle follows:

## **TOWN OF GROTON, CONNECTICUT**

### ***DEBT POLICY & MANAGEMENT / FISCAL PRACTICES***

*Revised by the Town Council on: February 4, 2014*

*Revised by the Town Council on: May 19, 2009*

*ADOPTED BY THE TOWN COUNCIL ON: SEPTEMBER 21, 1993.*

=====

**A. Purpose:**

1. To establish a criteria for the issuance of debt obligations so as not to exceed acceptable levels of indebtedness.
2. To provide consistency and continuity to public policy development through the Town's Capital Improvement Program, a mechanism that provides evidence of a commitment to meet infrastructure needs through a planned program of future financing, and
3. To transmit a message to investors and rating agencies who value such evidence of a community's commitment to financial management.

**B. Guiding Principles/General Policies:**

1. The Town Charter Section 9.13 "Borrowing" and applicable State Statutes governs the Town's issuance of debt as it pertains to referendum requirements and state mandated debt limitations.
2. The Town will conduct its debt management functions in a manner designed to maintain or enhance its existing credit ratings (Fitch: AA; Moody's: Aa2; and Standard & Poor: AA+).
3. Debt issuance will be utilized by the town only in those cases where equity, effectiveness and efficient use of limited resources favor debt over alternative sources of funds. The Town shall view debt as a mechanism to equalize the costs of improvements to present and future residents. The issuance of debt should provide a sufficient sum of money to make major improvements when it is needed and should take into account the relative costs of obtaining the funds. Decision criteria considered shall include the following:
  - (a) Debt shall be primarily used to finance capital projects with a relatively long life expectancy, i.e., ten (10) years or greater. Capital requirements that are recurring, of relative small scale, or are for short-lived improvement should be funded through current funds or the Capital Reserve Fund.
  - (b) Debt shall be issued in such a way so that the term of the financing does not exceed the useful life of the asset.

4. All budgeted funds are required to be balanced. As such, total anticipated revenues, plus fund balance applied if applicable, must equal the sum of budgeted expenditures for each fund.
5. The Town maintains a financial and budgetary control system to ensure adherence to the budget and an awareness of the financial environment, preparing quarterly reports to compare actual revenues and expenditures to budgeted amounts.

C. Capital Improvement Program:

1. A Capital Improvement Program shall be prepared by Town staff and submitted to the Planning Commission as per Connecticut General State Statutes.
2. The Town Council shall approve a Capital Improvement Program annually.
3. The Capital Improvement Program shall consist of a multi-year priority listing of long term capital projects, accompanied by a financing plan which finances all projects in the plan, and is supported by the appropriate sources of revenue. The financing plan shall be in accordance with the debt management policies contained herein.
4. It is the intent of these policies that authorized projects must be part of an adopted Capital Improvement Program.
5. Appropriations for construction or for other permanent improvements from whatever source derived shall not lapse until the purpose for which the appropriation was made shall have been accomplished or abandoned. However any project shall be deemed to have been abandoned if three (3) fiscal years lapse without any expenditure from or encumbrance of the appropriation therefore. Furthermore, any such appropriation which has not been completely expended at the end of five (5) years from the date thereof shall thereupon lapse, unless re-appropriated or extended.

D. Capital Reserve Fund:

1. A Capital Reserve Fund shall be funded annually to ensure that adequate funds are available to purchase equipment, repairs and improvements on a timely basis. This program is designed to stabilize budgeting for such purchases and to fund that part of the Town's capital budget related to those purchases.
2. As per council resolution adopted in December of 1984 and Ordinance Number 179 adopted on September 17, 1985, the Town Manager shall include in the proposed annual budget not less than four (4) percent of the total General Fund Budget for the purpose of paying current outstanding debt service and allocating funds to a "Reserve Fund for Capital and Non-Recurring Expenditures". The amount of said Capital Reserve Fund for capital items will be the remainder after subtracting the necessary debt service payments. The amount so allocated shall be subject to the annual budgetary process.

E. Management:

1. It shall be the responsibility of the Town Manager or his designee to maintain all necessary files associated with the issuance of Town debt.
2. The Town Manager shall submit for Council consideration a fiscal impact statement prior to any Council action to authorize a project involving the issuance of debt. The fiscal impact statement shall contain tables, charts and graphs which address the following:
  - (a) an estimate of the debt service levy to be required at the time of long term debt issuance,
  - (b) a calculation showing the impact of this additional levy to the existing debt service levy at that time,
  - (c) a schedule showing the impact of such issuance on the mill rate over the period of time that the issuance is for, and
  - (d) a table setting forth the computation of the debt limit of the Town and the debt incurring margin as set by State Statute and listing various debt ratios relating to the Town's indebtedness.

F. Debt Issuance Ratios/Limits and Repayment Schedules:

1. The Town shall use the following limits to guide issuance of debt:
  - (a) The Town shall not exceed fifty (50) percent of its statutory debt limit.
  - (b) Total direct indebtedness shall not exceed five (5) percent as percentage of full valuation (most recent equalized grand list as developed by the State of Connecticut).
  - (c) Total debt service shall not exceed ten (10) percent of the Total General Fund expenditures.
2. Repayment schedules shall be designed to relate to the useful life of the asset and generally be in accordance with the following:
  - (a) Fifteen (15) years for most general obligation public improvement debt.
  - (b) Twenty (20) years for benefit district debt and debt supported by special revenues.
  - (c) Ten (10) to twenty (20) years for capital improvement of town-wide significance and where justified by the magnitude of the project.
  - (d) On an overall basis, all general obligation debt shall be structured to retire at least fifty (50) percent of the Town's indebtedness within ten (10) years.

G. Operating Reserves:

1. The maintenance of adequate operating reserves is essential to the financial strength and flexibility of the Town as a whole. They are an integral part of the financial structure of the Town and help make it possible for the Town to issue debt. Operating reserves are a significant factor considered in evaluating and assigning credit ratings by the bond rating agencies.

2. The Town shall maintain the following reserves:
  - (a) An annual contingency reserve in the general fund operating budget which is not more than two (2) percent of annual expenditures.
  - (b) An unassigned General Fund reserve maintained in an amount equal to at least seven and three-quarters (7.75%) percent of annual general fund expenditures.
  - (c) A sixty (60) day reserve in special revenue funds in order to meet potential unanticipated needs.

H. Continuing Disclosure:

1. The Town is committed to continuing disclosure of financial and pertinent credit information relevant to the Town's outstanding securities and will abide by the provisions of the Securities and Exchange Commission (SEC), Rule 15c2-12 concerning primary and secondary market disclosure. The Town shall file such information through a nationally recognized municipal securities information repository (NRMSIR) and where applicable on the Town's web page.

I. Alternative Financing Plan:

The Town Manager is allowed to suggest to the Town Council an alternative financing plan for proposed capital projects if a complete analysis indicates that an alternative approach is deemed in the best interests of the Town of Groton.

(b) *Allocation to reserve fund.* The town manager shall include in the proposed annual budget to the town council an allocation of funds to the reserve fund based on the following formula: Calculate the amount of not less than four percent of the general fund budget, subtract the sum necessary to defray general fund obligated annual debt service, the remainder amount to be allocated to the reserve fund for capital and nonrecurring expenditures. (Ord. No. 179, 9-17-85)

## **TOWN OF GROTON, CONNECTICUT**

### **BASIS OF BUDGETING AND ACCOUNTING**

#### **Background**

There are three basic categories of differences between the basis of accounting and the basis of budgeting that follows generally accepted accounting principles (GAAP) for state and local government: (1) Basis of Accounting – “Cash plus encumbrances” and “modified accrual” are two of the different ways to define revenue and expenditures; (2) Perspective – The budget and accounting reports may have different fund reporting structures, e.g., a budget may account for debt services in the Local Funds, while GAAP principles require that debt service be recorded in a separate fund; (3) Reporting Component – the Town’s Comprehensive Annual Financial Report (CAFR) may present “reporting components and funds in different ways than the budget document.

#### **Accounting System**

The Town’s accounting system is organized and operated on a fund basis. A fund is a group of functions combined into a separate accounting entity (corresponding to a corporation in the private sector) having its own assets, liabilities, equity, revenue and expenditure/expenses. The types of funds used are determined by GAAP. The number of funds established within each type is determined by sound financial administration. Specialized accounting and reporting principles and practices apply to governmental funds. Proprietary and trust funds are accounted for in the same manner as similar business enterprises or nonbusiness organizations.

#### **Internal Control**

Management of the Town is responsible for establishing and maintaining an internal control structure designed to ensure that the assets of the Town are protected from loss, theft or misuse and to ensure that adequate accounting data are compiled to allow for the preparation of financial statements in conformity with generally accepted accounting principles. The internal control structure is designed to provide reasonable, but not absolute, assurance that these objectives are met. The concept of reasonable assurance recognizes that: (1) the cost of a control should not exceed the benefits likely to be derived; and (2) the valuation of costs and benefits requires estimates and judgments by management.

#### **Basis of Budgeting**

The basis of budgeting refers to the conversions for recognition of costs and revenue in budget development and in establishing and reporting appropriations, which are the legal authority to spend or collect revenues. The Town uses a modified accrual basis for budgeting governmental funds under which expenditures are recorded at the time liabilities are incurred and revenues recorded when measurable and available to finance expenditures of the fiscal period. Propriety funds are budgeted using accrual concepts in which transactions are recognized at the time they are incurred, as opposed to when cash is received or spent. All operating and capital expenditures and revenue are identified in the budgeting process because of the need for appropriation authority.

The budget is fully reconciled to the accounting system at the beginning of the fiscal year, and in preparing the CAFR at the end of the fiscal year. A number of GAAP adjustments are made to reflect balance sheet requirements and their effect on the budget.
